# FL HYSTEROSALPINGOGRAM

Candice B. Tilles, MD 02/6/2024, 12:07 AM

Hi Erica,

The HSG was normal - your fallopian tubes were open. As we discussed, please come see me on cycle day 3 to do an ultrasound and blood work.

Dr Tilles

## Results

### Results

FL Hysterosalpingogram [IMG893] (Accession 56401140PRV) (Order 1615550240)

### Comments From the Doctor's Office

Hi Erica,

The HSG was normal - your fallopian tubes were open. As we discussed, please come see me on cycle day 3 to do an ultrasound and blood work.

2/5/2024 1:44 PM - Edi, 772303

### Narrative

FL HYSTEROSALPINGOGRAM

EXAMINATION DATE AND TIME: 2/5/2024 11:00 AM

COMPARISON: none

INDICATION: dysmenorrhea, family planning

FINDINGS:

Examination was explained to the patient in detail. She denies allergy to Betadine. Speculum gently placed. Cervix cleaned with Betadine x3. Flexible 5.5 French catheter was placed in the lower uterine segment and the balloon was expanded. Nonionic contrast was gently administered. The uterine cavity is normal. The fallopian tubes are normal. Spill is elicited bilaterally. Fluoroscopy time 0.1 minute, total 9 images.

## Impression

IMPRESSION: Normal hysterosalpingogram.
