Microscopic description:	.	.	.
Note:	Comment	Comment ^{CM}	Comment ^{CM}
Comment: The Pap smear is a screening test designed to aid in the detection of premalignant and malignant conditions of the uterine cervix. It is not a diagnostic procedure and should not be used as the sole means of detecting cervical cancer. Both false-positive and false-negative reports do occur.			

Methodology:	Comment	Comment ^{CM}	Comment ^{CM}
Comment: This liquid based ThinPrep(R) pap test was screened with the use of an image guided system.			

HPV	Negative	Negative ^{CM}
Negative		
Comment: This nucleic acid amplification test detects fourteen high-risk HPV types (16, 18, 31, 33, 35, 39, 45, 51, 52, 56, 58, 59, 66, 68) without differentiation.
